Clear Upside – Immediate Catalysts

Pedra Branca Palladium-Platinum Asset

APRIL 2024 CORPORATE PRESENTATION

VALOREMETALS.COM

Forward-Looking Statements

This presentation contains "forward-looking statements". These forward-looking statements are made as of the date of this presentation and ValOre Metals Corp. does not intend, and does not assume any obligation, to update these forward-looking statements. Forward-looking statements include, but are not limited to, statements with respect to the timing and amount of estimated future exploration, success of exploration activities, expenditures, permitting, and requirements for additional capital and access to data.

Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, risks related to actual results of current exploration activities; changes in project parameters as plans continue to be refined; the ability to enter into joint ventures or to acquire or dispose of property interests; future prices of mineral resources; accidents, labor disputes and other risks of the mining industry; ability to obtain financing; and delays in obtaining governmental approvals or financing.

This presentation does not constitute an offer to sell or solicitation of an offer to buy any securities of ValOre Metals Corp.

Fábio Valério (P.Geo.) and Porfirio Cabaleiro (P.Eng.), of GE21 are the Qualified Person, as defined in NI 43-101, responsible for the Pedra Branca mineral resource estimates as reported herein.

The technical information in this news release has been prepared in accordance with Canadian regulatory requirements set out in NI 43-101 and reviewed and approved by Colin Smith, P.Geo., ValOre's Vice President of Exploration.

Clear Upside and Immediate Catalysts

Team

Board driving CAD\$1.6B in recent transactions; technical team played part in numerous meaningful discoveries;

<u>Proud member of Discovery Group (CAD\$2B in exits in 2022 alone)</u>

Plan

2023 / 2024 targeted drill program planned to discover new mineralized zones and expand known resources (6,150 m drilled in Phase 1); deliver PEA (2024)

Project

2.2M oz Palladium-Platinum in 7 near surface inferred resource zones to-date*: excellent regional infrastructure and strong community support; 80 km+ of prospective PGE trend with significant additional discovery potential

Management & Advisors

Rob Scott

CFO

- Involved in raising over \$200M in equity capital for growth companies
- Background in IPO's, RTO's, corporate re-structuring, M&A, and cost-effectively running international exploration operations
- CFO of Great Bear Resources Ltd from recapitalization through discovery (Jan 2017 – May 2021) – Sold to Kinross Gold Corp. for CAD \$1.3 billion.

Colin Smith

VP Exploration

- Registered P.Geo in BC,SK, NU and the NWT, with 18+ years experience advancing exploration and mining projects in North and South America.
- Technical expertise in epithermal and mesothermal Au, ultramafic-associated Pd-Pt, oxide Au, porphyry Cu-Au, kimberlites, unconformity-related uranium, and coal.
- Senior Exploration Geologist with Claude Resources Inc. pre-, syn- and post-acquisition by SSR Mining Inc. in 2016 for \$337M CAD
- B.Sc. Geology (University of British Columbia), and an M.Sc. Economic Geology (University of Victoria).

Thiago DinizExploration Manager

- 10 years+ experience on early to advanced-stage PGEs, orogenic and magmatic hydrothermal Au and Au-Cu, sediment-hosted Zn-Pb, phosphate, and potash projects in Brazil and Canada.
- Solid experience in development and management of large-scale drilling, field mapping and metallurgical programs.
- Registered P.Geo with a B.Sc. Geology (Federal University of Minas Gerais), and a M.Sc. Economic Geology (Queen's University).

Jeff DareCorporate Secretary

- Compliance professional with 15+ years experience advising companies on internal / external reporting as Listed Issuers
- Assisted in raising upwards of \$200M in equity capital for growth companies since 20XX.
- Senior Officer positions with a number of TSX-V Listed Issuers.

Marina Carvalho Lead Administrator

- Degree in Business Administration with 15+ years experience advancing exploration projects in Brazil, including two world-class mineral deposits (Belo Sun – Au, and Brazil Potash)
- Involved in environmental licensing for projects in north and south Brazil
- Development of capacity programs with employees and the local community

Why Pedra Branca? High Value Mineralization on a District Scale

Leveraging Substantial Prior Investment to Maximize Development Potential

Regional ports, roads, infrastructure; valuable exploration data; large land position

Defined High Value Mineralization on a District Scale

2.2M oz Palladium-Platinum in 7 near surface inferred resource zones*, spanning 80 km+ of prospective PGE trend

Proven Exploration and Discovery Potential

- Doubled resource 2020/22 methodology highly effective at adding ounces (from 1.1M to 2.2M oz in 2 years)
- 4 resource expansion targets / 3 drill-ready discovery targets 2023 Phase 1 drill program now complete

How We Doubled Our Resource at Pedra Branca

Compile & Review Historical Data Geological Mapping & Prospecting

Trado® auger drilling

Trenching

TARGETED DRILLING

2,504 m in 752 auger holes 2,641 m excavated in 49 trenches

17,000 m of resource drilling in 2020-21

Grew inferred resource from 1.1 to 2.2 Moz

Delivering Maximum Value - 18 Month Road Map

Aggressive exploration and discovery (program defined)

Generate updated inferred resource

Define the development plan; Continued drilling exploration

PEA

July/
23

Define the development plan; Continued drilling exploration

Statement from Chairman and CEO

From our perspective, nothing beats a mineral discovery to impact the value of a project, and consequently, to add immediate value for shareholders.

At Pedra Branca, the stage is now set for rapid success through exploration and discovery, in tandem with the delivery of a preliminary economic assessment by the end of 2024."

Jim Paterson
Chairman & CEO

Appendix: Pedra Branca 2022 Inferred Resource Estimate - Parameters

- 1. The Mineral Resource estimates were prepared in accordance with the CIM Standards, and the CIM Guidelines, using geostatistical, plus economic and mining parameters appropriate to the deposit.
- 2. All figures have been rounded to the relative accuracy of the estimates. Summed amounts may not add due to rounding.
- 3. Mineral Resources are reported with effective date March 08, 2022.
- 4. Mineral Resources were classified as Inferred. An Inferred Mineral Resource has a lower level of confidence than that applying to an Indicated Mineral Resource and must not be converted to a Mineral Reserve. It is reasonably expected that most of the Inferred Mineral Resources could be upgraded to Indicated Mineral Resources with continued exploration.
- 5. Mineral Resources, which are not mineral reserves, do not have demonstrated economic viability. The Mineral Resources may be materially affected by environmental, permitting, legal, marketing, and other relevant issues.
- 6. Mineral Resources are based upon a cut-off grade of 0.4 g/t PGE+Au, correlated to Pd_eq grade of 0.35 g/t.
- 7. Mineral Resources were limited by an economic pit built in Geovia Whittle 4.3 software and following the geometric and economic parameters:
 - 1. Pit slope angles: 55°;
 - 2. Price: Pd=US\$2000/oz, Pt=US\$1000/oz and Au=US\$1800/oz;
 - 3. Costs: Mining costs=US\$2.00/t; Milling=US\$12.00/t; G&A=US\$1.50/t.
 - 4. Metallurgical Recoveries:
 - 1. Weathered rock: 68% for Pd, 67% for Pt and 40% for Au;
 - 2. Fresh rock: 71% for Pd, 82.9% for Pt and 85.2% for Au.
- 8. Blocks estimated by Ordinary Kriging at support of:
 - 1. Trapia, Massapê, Esbarro: 40m x 40m x 4m with sub-block 5m x 5m x 2m;
 - 2. Santo Amaro, Cedro, Cana Brava: 20m x 20m x 4m with sub-block 5m x 5m x 2m;
 - 3. Curiu: 10m x 10m x 4m with sub-block 5m x 5m x 2m.
- 9. PGE+Au grade = Pt g/t + Pd g/t + Au g/t.
